CGI.br opened the call for proposals of workshops for the VII Internet Forum in Brazil

The Internet Forum in Brazil is promoted by CGI.br since 2011 and is a preparatory activity for the Internet Governance Forum (IGF). Through this forum, CGI.br seeks to encourage representatives of different sectors to accompany and comment on the most relevant issues for the consolidation and expansion of an increasingly diverse, universal and innovative Internet in Brazil and to express the principles of freedom of human rights and privacy, as presented in the Decalogue of principles for governance and Internet use.

The seventh edition of the Internet Forum in Brazil will be held from November 14 to 17 in the city of Rio de Janeiro with the title "Shaping your digital future".

Until August 20, CGI.br receives proposals of workshops for the VII Internet Forum in Brazil. Individuals and organizations can send their proposals through the following form

Guatemala 2017 Internet Governance Forum

The first IGF of Guatemala took place on July 27. The aims of the forum were: build capacity and promote a better understanding of internet governance issues among multiple stakeholders. Facilitate the discussion and exchange of ideas and opinions. Encourage collaboration, bring the perspectives of their communities to the agenda of the Global IGF and reflect the perspectives of Global IGF at INR events when and where necessary and relevant.

NIC Argentina at Expointernet Latin America

NIC Argentina participated in the Expointernet Latin America, which took place from June 29 to July 1 at the Fairground of La Rural in Buenos Aires.

During the three days, more than 5000 people toured the exhibition and participated in business rounds and workshops. The event counted with 75 exhibitors who presented the latest technology developments such as Internet of Things, Big Data and applications that are transforming day to day the needs and demands of users.

NIC Argentina set up a stand and offered the conference "NIC Argentina, present and future", where they informed about their functions and projects to the participants.

Here the details of the event: http://expointernetla.com/
APTL72

On September 14 and 15 APTLD72 will take place in Tbilisi, Georgia.

Federico Neves representing LACTLD will offer a presentation about our Anycast cloud.

On September 12 and 13, DNS – DNSSEC training sessions will be held by the hands of the experts Berry van Halderen and Jaap Akkerhuis from NLnet Labs.

The two day-long course will cover a brief recap of some DNS fundamentals, roles of different name-servers and delegation; major DNSSEC building blocks; key storage considerations and SoftHSM; practical planning of your DNSSEC policies and configuration, etc.

ITU World Telecommunication Development Conference

The ITU World Telecommunication Development Conference 2017 (WTDC-17) will take place in Buenos Aires, Argentina, from 9 to 20 October 2017.

Under the overarching theme, ICT for Sustainable Development Goals, WTDC-17 represents a unique opportunity for the international community to gather and discuss the future of the telecommunication and information and communication technologies (ICT) sector and its contribution to the achievement of the Sustainable Development Goals (SDGs). WTDC-17 will attract more than 1,500 participants, including over 100 government ministers and high-level delegates.

Some of the expected outcomes include: the Buenos Aires declaration, which will reinforce the political support for the mission and strategic objectives of ITU-D (Telecommunication Development Sector), and the Buenos Aires action plan comprising regional initiatives, new and revised resolutions and recommendations to support the fulfilment of the sector’s objectives.

WTDC-17 will also host a series of side events to highlight the role that ICTs play in achieving socio-economic development. These special events will focus on: accessibility for persons with disabilities; connectivity in least developing countries, landlocked developing countries and small island development states; gender issues; youth employment; affordable access; the role of academia; emergency telecommunications; small- and medium-sized enterprises and innovation; cybersecurity; e-health and spectrum management.

ICANN59 Reports

ICANN published in two reports Community Feedback and By the Numbers, the ICANN59 participant survey, and the technical, demographic, and attendance statistics.

These reports summarize the results from ICANN’s second Public Forum Meeting since the implementation of the new meeting strategy. Their goal is to improve and obtain a better understanding of how the needs of participants are being met, based on the feedback and statistics obtained and get to know the changes that need to be implemented.

These reports are part of ICANN's commitment to transparency.

Here links to the reports:

ICANN59 By the Numbers report

From July 3 to 5, the TICAL 2017 annual conference was held in San José, Costa Rica.

In order to contribute to the issues that compromise the role and the work of the ICT Directors of the universities of Latin America, in early 2011 RedCLARA promoted the creation of TICAL.

The formation of this community, aims to foster a space of knowledge and collaboration for technology managers of universities, where it is possible to share experiences, exchange knowledge, motivate initiatives, understand trends and tackle common problems, among others. TICAL also opens the possibility of establishing connections between the institutions, encouraging the generation of collaborative ties to take advantage of the synergies of the group.
